

How to register a child in the Rejsekort app

Registering a child in the Rejsekort app is done in 3 steps:

- 1 A parent or guardian downloads Rejsekort as an app on their own phone.
- 2 The parent or guardian then starts the registration of the child in their app.
- 3 The child finishes the registration in their own app.

Start registration on parent's/ guardian's phone

Click on Children and then click Add child.

i If you haven't already downloaded Rejsekort as an app and signed up as a user, please do so before continuing.

Log in with MitID

Follow MitID's log-in steps.

i If you do not have MitID your age (18 years +) needs to be confirmed before you can register a child in the app. You confirm your age by filling out this form: <u>ansøgningsformular</u>.

Enter information about the child you wish to register and accept the terms and payment.

Please note that by accepting the terms, you also declare that you have parental authority or are the legal guardian of the child, and that you accept responsibility for paying for the child's and possible fellow travellers/bikes journeys.

Your acceptance will also apply when, later in 2025, children aged 15–17 will be able to link their own payment card. Consent can always be withdrawn.

Invitation code

You will receive an invitation code on your phone, which must be used on the child's phone.

You can copy the code by clicking the icon to the right of the code and share it, for example, by sending it as a text message.

Children

The childs name is now visible under Children.

Here you can add another child or click the "x" in the top left corner to return to the home screen.

Now registration continues on the child's phone

First download the app on the child's own phone

Start registration on the child's phone

Click on 'Continue' to accept location tracking. Click on 'Continue' again and then click 'I'm under 18'.

i If you have not already downloaded the Rejsekort app on the child's phone, do so before continuing.
